

Phase 4 – Project Planning Phase

Access Control Planning:

The project uses separate ACL operations to control access to the u_institution_details table.

- READ: bb1 role, with Branch is EEE data condition and a script-controlled decision.
- CREATE: bb2 role.
- WRITE: bb3 role.
- DELETE: bb4 role.

Administrators retain full access through the script for the READ ACL.

Create multiple records in the Student Records table with different branch values (ECE, EEE, CSE).
