

Phase 8 – Project Demonstration

Demonstration Flow:

1. Log in to the ServiceNow instance with admin access.
2. Show the EEE User and the assigned roles bb1, bb2, bb3, and bb4.
3. Show the Institution Details table and its fields.
4. Show records with ECE, EEE, and CSE branch values.
5. Demonstrate the READ ACL and the script-controlled access decision.
6. Demonstrate CREATE, WRITE, and DELETE permissions according to the required roles.
7. Impersonate users and verify the access behavior.

Outcome:

By completing this lab, learners gain a comprehensive understanding of how script-controlled READ, WRITE, CREATE, and DELETE ACLs enforce record-level security, how user roles and record field values are evaluated together to make access decisions, and how ACLs protect sensitive data from unauthorized viewing, modification, creation, and deletion across forms, lists, and Service Portal interfaces.
